Buyer: Engineering teams, bootcamps, internal enablement

Sample setup: \$1,500

Sample monthly support: \$299

Sell evaluation, setup, integration, training, support, reporting, and outcomes - not ownership of code you do not own.

AgentENV

Offer: Agent Sandbox Infrastructure Pilot

Buyer: AI labs, agent platforms, evaluation teams

Sample setup: \$7,500

Sample monthly support: \$2,499

Sell evaluation, setup, integration, training, support, reporting, and outcomes - not ownership of code you do not own.

GodotHub

Offer: Godot Studio Workflow Setup

Buyer: Indie studios, schools, game-jam teams

Sample setup: \$1,200

Sample monthly support: \$249

Sell evaluation, setup, integration, training, support, reporting, and outcomes - not ownership of code you do not own.

Claude of Duty

Offer: AI Game Build and Evaluation Workshop

Buyer: AI builders, game teams, schools

Sample setup: \$997

Sample monthly support: \$199

Sell evaluation, setup, integration, training, support, reporting, and outcomes - not ownership of code you do not own.

COPY-AND-PASTE AGENT PROMPT

Create a Lux Money Play for one reviewed application. Use only verified facts from the review and official sources. Separate facts, inferences, and ideas to test. Produce buyer profiles, five monetization paths, Starter/Growth/Agency packages, editable USD examples, a seven-day pilot, a 30-day launch, sales copy, delivery SOP, license/privacy/security risks, and a go/no-go verdict. Do not sell code the operator does not own and do not guarantee earnings.

CONTROL CHECKLIST

- Verify the license.
- Test with non-sensitive data.
- Use minimum permissions.
- Document backup and rollback.
- Define support boundaries.
- Require human approval.
- Do not guarantee revenue.
